— TEAMSESCO —
STAR SERVICE
GUARANTEED REPAIRS

DXP

Founded as Southern Engine and Pump Company

in 1908, DXP was re-chartered in 1979 as Sepco Industries and renamed DXP Enterprises, Inc. in 1996. Over the years, we have strengthened our ability to support our customers by acquiring a

IGBT
Repair

diverse group of companies with a powerful corporate focus on product expertise, technical services and MROP supply chain management. Today, DXP is a publicly traded professional distribution management company and continues to stay on the leading edge of technology, training and products while attracting and retaining the best employees. Our corporate strategy is simply to be the best solution for the industrial customer.

TEAMSESCO provides quality repairs on all brands of wind power electronic equipment.

Every repair is backed

by our exclusive,

one-year, **STAR SERVICE** warranty and tracked using our state-of-the-art barcode tracking system. Before any repair ships, it undergoes complete comprehensive testing based on the original design specifications. Additionally, we utilize infinitely variable semiconductor load testing for applicable repairs insuring that your repaired unit works in the field as well as it did in our facility. This level of testing is critical to TEAMSESCO's overall quality control and reliability guarantee.

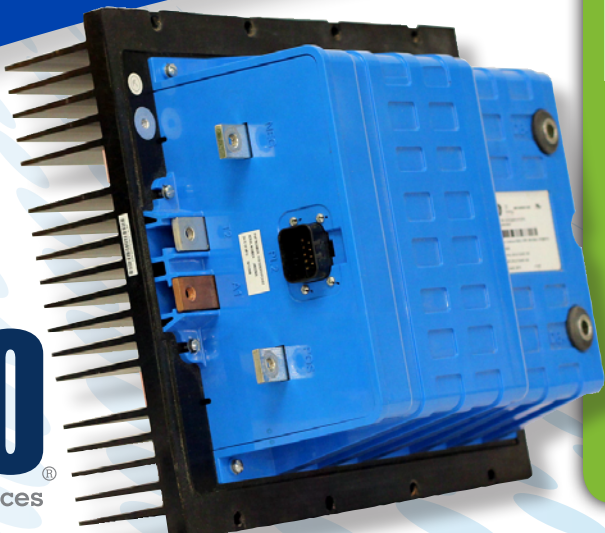

— TEAMSESCO —
STAR SERVICE
GUARANTEED REPAIRS

TEAMSESCO is also uniquely qualified to service and repair your complete servo systems: including servo motors and drives. Since we can repair both it gives us the ability to test the units together before shipment. Send in your repairs today for a **FREE, NO OBLIGATION** evaluation!

- ★ and more!

DXP'S GREEN PROJECT

As a pioneer in the Industrial Distribution of MROP products, DXP has partnered with some of the leading manufacturers in the industry to identify green solutions that facilitate our customer's "go green" initiatives.

DXP's Green Bulletin features environmentally friendly products, energy conservation solutions as well as solutions to eliminate contaminations and spills. These "green" options provide us with the opportunity to contribute to energy conservation as well as meet our customer's needs for more environmentally friendly solutions.
